HOSTED CLOUD BACKUP

Hosted Cloud Backup provides our customers with a strategy for backing up data by sending a copy of the data over a proprietary or public network to our data center.

## BIGGEST BENEFIT

Minimal maintenance and more control to protect your business from user error, data loss, natural disaster and so forth.

## FEATURES

1

### Native Microsoft Exchange backup

Our Cloud Backup supports Exchange 2003, 2007, 2010 and 2013. We can backup full servers or individual messages with flexible scheduling. Cloud Technology Advisors also runs automated backups in the background to avoid interruptions.

2

### Fast, flexible recovery

We offer a simple and fast restore tool that allows us to react quickly to data loss and restore specific mailboxes or messages with granular recovery. We can even sort by date to restore full Exchange Information Stores.

3

### Exceptionally responsive

Due to our toolsets and features and functionality within our Cloud Backup solution our response time, dictated in our SLAs, are exceptional. Given the acute nature of your data, response times are critical to every business.

# CLOUD AT YOUR FINGERTIPS. MIGRATE TODAY!

Every organization needs Cloud Backup. Here are some complementary services you should also consider:  
ENDPOINT PROTECTION • WEB PROTECTION • BUSINESS CONTINUITY • ARCHIVING
