

Our archiving service automatically archives every email sent and received by every mailbox in your domain to multiple off-site locations. Via our Hosted Exchange service, a copy of every email sent and received is indexed, cataloged, and searchable through a web-based interface that is easy to use as well as HIPAA, GLBA, and SOX compliant.

BIGGEST BENEFIT

A reduction in your storage footprint because it's hosted.

FEATURES

1

Unified archive

Archiving through Cloud Technology Advisors securely organizes and preserves your intellectual business assets, reducing the risks that often result from poorly managed, lost or deleted messages. We also provide powerful real-time monitoring and audit tools for regulatory compliance, eDiscovery and supervision.

2

World-class security

Our stringent security, business and operations controls ensure the safety and security of your data while providing you with assurances and transparency into these very controls.

3

Compliance-based

Compliance is a large concern organizations are continually addressing – especially if your organization resides in any particular vertical. We eliminate any compliance issues and headaches associated with email archiving.

CLOUD AT YOUR FINGERTIPS. MIGRATE TODAY!
