

Archiving and Business Continuity ensure your organization's critical business functions will continue to work or be protected in case of an unplanned, detrimental incident.

## BIGGEST BENEFIT

Archiving and Business Continuity provide risk management, data-loss prevention, recovery times, and are compatible with all major mail servers.

## FEATURES

# 1

### Searchable content

Archiving gives you the ability to preserve and make searchable all email to/from an individual with the intent to make email messages quickly and easily accessible and available at a later date. Compliance archiving is an essential feature to hosted email archiving.

# 2

### Compliance needs

Business Continuity is critical to business operations. Cloud Technology Advisors provides an increased level of confidence, compliance benefits, and risk mitigations. Protect your business; protect your customers by enabling this critical service.

# 3

### Deduplication

Resolve three major archiving problems addressed with one solution including safe storage, deduplication, encryption, searchable efficiencies and major compliance needs within your organization by partnering with Cloud Technology Advisors.
