

Our Encryption at Rest allows you confidential business communications safely, letting users send and receive encrypted email directly from your desktop as easily as regular email.

BIGGEST BENEFIT

The perimeter-based design simplifies compliance and governance by ensuring that all your users adhere to enterprise privacy and security policies with no need to install client software on individual desktops. Enable encryption at rest with Cloud Technology Advisors for scalable, cost-effective, superior data security that requires minimal impact on your operations, seamless implementation and adds a major level of security businesses today need.

FEATURES

1

Cleartext protection

Encryption at Rest protects against targeted approaches on networks that do not adequately secure storage, as data is still stored in cleartext, dangerously open to a wide range of internal and external attacks.

2

Scalable and affordable

Advanced, integrated security features provide your customers with a cost-effective and compliant friendly data security solution that is undistruptive to your daily operations.

3

Ease-of-consumption

By teaming up with Cloud Technology Advisors you can effortlessly eliminate the additional stress back-end data security can bring. Our click-to-provision Encryption at Rest service adds another level of security to protect your data.

CLOUD AT YOUR FINGERTIPS. MIGRATE TODAY!

Enable Encryption at Rest for your business, and consider these complementary services in addition:
MICROSOFT EXCHANGE • ZIMBRA • SECURE MESSAGING • BUSINESS CONTINUITY • ARCHIVING
